

FIRST APARTMENT. LESS WASTE.

# A home, not a shopping haul.

Use what you have. Plan the few things you really need. Leave room to discover how you actually live in the space.

**Start here:** Circle one choice per item: **H** = already have, **B** = share or borrow, **N** = buy now, **L** = buy later, **S** = skip. Blank is a valid choice while you decide.

Move-in date (optional): \_\_\_\_\_

Three things that would make day one easier: \_\_\_\_\_

| Item or need | What job will it do? | My choice<br>H / B / N / L / S |
|--------------|----------------------|--------------------------------|
|              |                      |                                |
|              |                      |                                |
|              |                      |                                |
|              |                      |                                |
|              |                      |                                |
|              |                      |                                |
|              |                      |                                |

Before anything goes in the cart

- ☐ Could something I already own do the same job?
- ☐ Where will it live, and have I measured that space?
- ☐ Will I use it soon, or am I buying it to complete a room?
- ☐ Could I try a borrowed or shared option before committing?

Use the interactive planner, including 24 optional starter prompts:

SET A LIMIT, NOT A TARGET

# Give your money a boundary.

One-time setup planning only. Keep ongoing rent, bills, and other commitments separate. Enter your own totals, including tax and delivery.

A. My available setup budget (USD): \_\_\_\_\_

B. Keep-aside buffer (USD): \_\_\_\_\_

C. Other one-time costs not listed below (USD): \_\_\_\_\_

What other costs cover: \_\_\_\_\_

| Buy-now item | Estimated total (USD) | Price checked? |
|--------------|-----------------------|----------------|
|              |                       |                |
|              |                       |                |
|              |                       |                |
|              |                       |                |
|              |                       |                |
|              |                       |                |

D. Total of the priced buy-now items: \_\_\_\_\_

**Room after your plan = A - B - C - D**

My remaining amount: \_\_\_\_\_ USD

A negative result means the priced plan plus buffer is over your budget.

Check before trusting the total

- ☐ Every buy-now item has a price, or I have marked the estimate incomplete.
- ☐ Nothing is counted both as an item and under other one-time costs.
- ☐ Buy-later items are excluded. I have not mistaken this for an actual spending ledger.

What can wait? \_\_\_\_\_

MEASURE BEFORE BRINGING IT HOME

# Fit the item to your life.

Use one unit throughout each check. Measure usable space, with room to walk, open doors, and operate the item. A measurement match is not a fit guarantee.

MEASUREMENT CHECK 1

Item / room: \_\_\_\_\_

Unit (circle one): inches / centimeters \_\_\_\_\_

|                         | Width | Depth | Height |
|-------------------------|-------|-------|--------|
| Item dimensions         |       |       |        |
| Usable space dimensions |       |       |        |

☐ I checked the delivery route, packaging, assembly space, and required clearances.

Route / clearance notes: \_\_\_\_\_

MEASUREMENT CHECK 2

Item / room: \_\_\_\_\_

Unit (circle one): inches / centimeters \_\_\_\_\_

|                         | Width | Depth | Height |
|-------------------------|-------|-------|--------|
| Item dimensions         |       |       |        |
| Usable space dimensions |       |       |        |

☐ I checked the delivery route, packaging, assembly space, and required clearances.

Route / clearance notes: \_\_\_\_\_

**Also check:** doorways, corners, stairs, elevators, door swings, installation instructions, ventilation, and access needs. This worksheet does not calculate rotations or assess building or product safety.

## MAKE THE MOVE

# One useful step at a time.

Adapt these prompts to your lease, building, providers, household, and access needs. Timing is a suggestion, not an official deadline.

**BEFORE MOVING DAY**

- ☐ Confirm key pickup, building access, parking, lift bookings, transport, and help.
- ☐ Check what is already provided or shared before choosing what to bring.
- ☐ Arrange the services you are responsible for through your lease and providers.
- ☐ Plan important address updates through official channels and their deadlines.
- ☐ Pack an easy-to-reach bag for your own first-night and next-morning needs.

**MOVING DAY**

- ☐ Document existing condition issues before unpacking. Follow the property reporting process.
- ☐ Confirm keys, access instructions, and contacts for maintenance or urgent property issues.
- ☐ Check what arrived, and make a usable sleep, bathroom, and simple-meal setup first.

**FIRST WEEK AND BEYOND**

- ☐ Unpack before buying organizers. Try the layout using what you already own.
- ☐ Discuss shared items and routines with your household as relevant.
- ☐ Pass on reusable packing materials where practical; check local and building disposal rules.
- ☐ Review actual quotes and the buy-later list. Choose one change that solves a real problem.

My next small step: \_\_\_\_\_

**Need a flexible version?** The free online kit adds suggested dates, optional browser saving, budget calculations, item-list export, and a restorable backup. No signup or paywall.
